

January 24, 2012

Dear Jason,

Just a note to let you and your company know how pleased we are with the ThevoVital mattress.

Our Long Term Care Home provides care for many dementia residents and a collective decision was made, as to who our trial resident would be.

This female resident would settle to bed every evening, but within two hours, would be up wandering and rummaging in her roommate's belongings. She would not resettle and would spend the night in her wheelchair.

The first night with the Dementia Care mattress, she slept from 10 PM to 5 AM! This success continued throughout her trial. The only time she did not sleep, was when the staff were unable to settle her initially.

After a month with the mattress, we were able to remove it for another needy resident and her sleep pattern continued.

This mattress has proved to be extremely beneficial for the residents, thus decreasing the workload for the staff. The residents awake rested and we have seen less agitation and aggression on a daily basis.

Thank you for introducing us to this revolutionary product!

Sincerely

Deborah Kitchen, Director of Care, Woodland Villa.
