

EASyS – The rehab stroller

**... with
safety seat**

Thomashilfen

**The risk of tipping over is averted
thanks to the EASyS rehab stroller
with safety seat***

* exclusively by Thomashilfen

Safety in any position due to the patented shifting of the center of gravity

- Shifting the center of gravity (BSS® Balance Safety System) prevents the risk of tipping over in any position – from sitting upright to lying down fully reclined.
- When reclining, the safety seat automatically slides forward to a balanced, safe position.
- Children sit and lie down without the risk of tipping over.

Safe & attractive –
