Position Capable

Available as Prone, Upright, Supine or Multi-Position. You choose the style and configuration that suits your needs.

Fully Adjustable

Support pads, hardware, support straps and chest harness are all adjustable, supplying the best standing position, support and comfort in all configurations.

3 Foot Systems

Three foot systems allow you to choose how much positioning you need for each client. Choose from A one piece flat footboard, individually height adjustable or a fully multi-adjustable system that is height, width, depth, angle and rotation adjustable individually.

Mobile Base

4 easy rolling casters make the **bTs** easy to move.

Adjustability and Comfort

Tool-free adjustments allow easy changes to all of our body support pads, knee supports, support straps, chest harness and standing angle on each unit. Wide range of standing angle adjustment allows for ease of client positioning, adjustment and weight loading. Soft padded positioning supports and cushioned straps, plus complete adjustability, properly position the client to maximize standing time and tolerance.

Growth

bTs is designed to grow With your standing needs. **bTs** fits clients from 26" - 48" in supine and 30" - 48" in prone. **bTs Youth** fits clients from 40" - 60", both allowing for maximum growth throughout each individuals standing program. Multiple choices in pad mounting brackets allow for size and growth changes and orthopedic positioning needs.

Features

bTs Pediatric Multi-Position Stander gives you the right approach to standing - namely *your* approach. **bTs** standing range adjustment conveniently operates with a simple manual adjustment or an optional hands free foot pedal. Full adjustability allows you to custom fit the **bTs** to each individual and give them the standing program they need. Growth, Adjustability, Durability, Function, and Ease of Use make the **bTs** the ideal stander for all your standing needs.

2 Knee Systems

Adjusts for width, depth and height for optimum positioning and comfort for the lower extremities. (standard)

Optional: Size-Adjustable Kneepads allow you to adjust for various knee sizes and accommodate for braces.

Black Opaque Tray

Height, depth and angle adjustable for optimum positioning of the upper extremities. (Optional Item)
